"Earth Healing Workshop"

with  
"Michael Stodola"

**Join Us!** At this is a two day workshop, where you will experience an **"Environmental Clearing Program"** skillfully presented by **Michael Stodola**. One of Michael's major spiritual work for others is to clear properties and people of disruptive or disharmonious energies. With the help of the "Devic Society for Environmental Harmony", he performs this service both on site and from a distance. Michael also enjoys teaching workshops on these aspects of "Earth Healing". Michael's workshop, which has evolved over years, will allow you to explore various ways of clearing your environment of the negative and noxious energies which distort nature and prevent us from peaceful co-existence with each other and the other life forms that share this planet with us.

Geopathic stress is a term used to describe the energies that tend to disrupt some living systems especially in humans. Some of these energies occur naturally, but many of them are the result of mankind. Our development of technologies and our emotional traumas can lock these negative energies into the land. It is our obligation to help remove these energies and help to restore our planet's harmony.

There are various terms in use for the many energy fields found in nature. For our purposes we refer to them as "Devas" and "Nature Spirits". The Devas are the intellectuals with the plan while the Nature Spirits work towards fulfilling the Devas plan. Many of these non-physical beings can be communicated with and are willing to work with those who respect them. All action in the physical plane begins on the non-physical level. The clearings and adjustments you will learn about in our workshop will be performed on the non-physical level and will have a strong impact on our physical environment.
